

CN10 BED-STAY

Quick and easy to set-up, yet refined, CN10 Bed-Stay is the perfect sleep accommodation for visitors and staff at open-air festivals or anywhere there is a need for relatively short-term accommodation (e.g., military field exercises, emergency humanitarian or disaster situations).

The CN10 Bed-Stay is based on the standard foldable CN10 standard container, in which 2 bed frame systems with mattresses are installed into the floor, so comfortable sleeping accommodations for 2 people can be easily created in just a few minutes.

- ▶ Bed size: 190x75 cm
- ▶ Bed height: ~53.5 cm
- ▶ A 199x86x46 cm (LxWxH) storage space is available under the beds

Trays inside the floor made of 18 mm waterproof plywood serve as storage for the bed components during transport. The lids of the trays are made of 18 mm step-resistant plywood, which function as walking surfaces when closed and as bed legs when opened.

The bed frame is made up of sturdy aluminum rails, into which the mattress can be threaded in seconds, and thus the bed is ready for immediate use after snapping it into the console mounted inside the lid.

CN10 STANDARD

Continest is a market-leading foldable container solution, specially developed for the purpose of relatively short-period usage anywhere there is a need for handling large crowds for lodging, office/meeting space, cash/retail sales, in addition to storage, cooling, and heating.

Size (L x W x H):

- ▶ Closed: 3000 mm x 2440 mm x 495 mm
- ▶ Open: 3000 mm x 2440 mm x 2624 mm
- ▶ Inner height: 2420 mm
- ▶ Inner width: 2260 mm
- ▶ Inner length: 2428 mm

Weight:

- ▶ 1070 kg (1 truck = 20 units, accommodations for 40 people)

Logistical advantages:

- ▶ 20 units can be loaded on a standard trailer
- ▶ Can be loaded on PMC pallets for air freight
- ▶ Decreased logistical and administration costs (e.g., entrance permits) by 80% as it is stackable in folded position
- ▶ Decreased space needed for warehousing by 80%
- ▶ It can be on and off loaded, set-up, and torn down with one machine (forklift, telehandler, crane)

Operational advantages:

- ▶ Quick set-up and teardown (on leveled surface 5 -10 mins)
- ▶ Set up and teardown done by 1 crew + 1 operator
- ▶ Optimal on-site space usage (scalable)
- ▶ Safe: the unit uses patented hinge technology to ensure stability and only specific machinery can initiate teardown
- ▶ Large option of set-up variations
- ▶ Multifunctional: uses include accomodation, office, first aid, storage, etc.
- ▶ High comfort: insulated units can be cooled or heated
