CN20 BH – “BLACK HOLE”

SCIF (Sensitive Compartmented Information Facility)

Designed for military field camps or standalone law enforcement applications. Tailored to specific customer requirements.

Developed in coordination with the S2000 team.

Rapidly deployable, space-saving container providing full-spectrum protection against optical, acoustic, and radio-electronic eavesdropping.

Combining active and passive security solutions, the system ensures maximum physical and data protection, including EMP shielding for sensitive IT equipment.

No unintended data leaves the container.

Key features:

- ▶ Shielded frequency range: 50 Hz – 40 GHz
- ▶ Damping capacity: 110 dB
- ▶ Advanced absorption of radar & laser (no reflections)
- ▶ Closed-loop air system with oxygen supply and CO₂ absorption

Standards:

- ▶ MIL 285
- ▶ NSA 94-106
- ▶ IEEE 299
- ▶ VG-Norm 95 370 Part 15
